OLQ FAX: (317) 232-3403

DUST SUPPRESSANTS AND SUPPLIERS

The attached list does not constitute an endorsement of these firms or their products. This list includes those vendors that have shown an interest in providing dust control products or services in the State of Indiana. This list is not intended to be comprehensive, but it does include all those firms which staff were aware of at the time of preparation. The list will be revised as new vendors are made known to us.

Effectively July 1, 1989, Indiana Code 13-30-2-1, (formerly 13-7-4-1) prohibited the application of used oil to any ground surface based upon environmental concerns.

The materials listed here have not been evaluated by this Department with respect to environmental/hazards or other objectionable characteristics, but to the best of our knowledge do not contain used oils.

Indiana has experienced situations where pollution problems have occurred because of the use of dust suppressants. As with any product applied to the land, the product should be carefully evaluated as to its formulation, place and manner of application to prevent problems from being created.

The list was compiled by Mr. Dave Berrey of the Indiana Department of Environmental Management, Office of Solid and Hazardous Waste Management, Hazardous Waste facilities Branch, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana 46206-6015. Mr. Berrey can be reached by calling: (317) 232-4417.

Persons wishing to discuss concerns they are having with dust, or file complaints with the Department regarding fugitive dust should call the Office of Air Management at (317) 233-5674, and ask for the appropriate county inspector.
